To Whom It May Concern,

I am writing this letter on behalf of Anthony Spencer. I have taught Anthony Algebra 1 and Algebra 2. Anthony is a very smart young man who works diligently on things that he is motivated by. Often in class, I would see him typing code for one of his many projects at Vo-Tech. The way he thinks is creative and innovative. If there is a problem, Anthony will try to code up a solution to solve it. He amazes me and is truly a step up from his peers in this regard. However, sometimes he would let his coding take precedent over his math work, which greatly affected his grade in Algebra 2. Unfortunately his final grade didn't reflect what I felt he was truly capable of doing. If he can learn to prioritize and use his time wisely, I think there is nothing stopping him! I truly think he will invent or create a program that all of us will be using someday.

While he may struggle with focus, he is one of the friendliest, most respectful students in our building. He definitely likes to lighten a mood by cracking a joke or asking me how my day is going. Anthony loves to pop in to show me what he is working on or what he is learning at Vo-Tech. Even if I am lost most of the time, I enjoy seeing his passion shine through as he is explaining it to me. It's his excitement that tells me he has chosen the right field of study for his life. I can't wait to see what he does! If you have any questions, please feel free to give me a call at 438-7673.

Sincerely,

Amy Mumau
